The little gourmet lentil! **Organic lentils "french lentils"** **Nutritious and aromatic**

The **green lentil (french lentils)** is an exceptionally noble type of lentil that we obtain from the **Canadian plateaus**. The soils of this region are particularly productive and fertile. They release their numerous trace elements and minerals to the lentil, making it a **nutritious food**. Very rich in magnesium, potassium, zinc and iron, it contains complex carbohydrates and fiber.

The green-marbled lentils taste **distinctively nutty** and remain predominantly firm to the bite even after a longer cooking time. As an aromatic delicacy, it enjoys great popularity in international cuisine, and not only among gourmets.

In our assortment there are

Organic lentils, green (french lentils)

Our innovative addition to sales

... is ready for new challenges

May we present? Our new employee is called **Lisa Keller**. With her dedicated nature she will support the sales department extensively. We are happy to welcome her in our team.

In a short **interview** you can get to know her a little bit...

What do you find so interesting about our company and what is your motivation for starting at Delphi Organic?

It is important to me to find a modern company whose philosophy and products I stand behind. At Delphi, a sense of social and environmental responsibility is paramount.

What are you looking forward to in your work at Delphi Organic?

So far, I have had nothing but positive experiences at Delphi. I am looking forward to continuing my very exciting and varied work in a harmonious and cooperative environment.

Which country would you like to travel to?

Texas is still on my agenda for this year.

Then I would be able to visit a country outside Europe for the first time.

What is your favorite snack from the Delphi Organic range?

My favorites are definitely macadamia and pecan.
