- Natural and delicious: **organic avocado oil** for gourmet lovers
 - The **Macadamia** Miracle: **Organic oil** for your well-being
 - Health and taste in one: **Organic coconut oil VCO** and **RBD**
-

**The taste of Kenya:
Organic-Avocado oil
Oil with exceptional qualities**

Kenya's lush, sun-drenched hills are home to one of nature's tastiest and healthiest fruits: the **avocado**. The Kenyan avocado, often called "green gold", provides avocado oil of the highest quality. Due to the altitude, **no artificial irrigation** is necessary. The carefully selected fruits are gently cold-pressed to ensure that the valuable nutrients and rich flavour are preserved. **Healthy unsaturated fats** promote heart health and keep cholesterol levels in balance. Its high smoke point makes it ideal for frying and grilling without losing its nutrients. Its **mild, fruity flavour** makes it a delicious addition to salads, dips, and hot dishes. It is rich in vitamin E, which nourishes the skin and can protect against premature ageing, and its high vitamin C content promotes collagen production. Our **organic virgin avocado oil** is grown to the highest quality standards in mixed culture with macadamia trees and is of course free from harmful chemicals and additives. We also carry the organic **avocado oil RBD**.

In our assortment you will find

Organic-Avocado oil virgin

in 900 kg paper IBC's and on request in 190 kg drums possible

Organic-Macadamia oil

A culinary delight

Our **organic virgin macadamia** oil is cold-pressed from the macadamia nut, which preserves the valuable ingredients. In particular, the healthy **omega-9 fatty acid** contributes to maintaining healthy cholesterol levels. In a complex drying process, the nut is dried for a longer period of time before cracking, which makes it an expensive product.

Our oil is grown in **Kenya**, in the same certified organic farming project as the organic avocado oil. This helps to support local farming families and promote sustainable agricultural practices. The oil should not be heated too much and refines both **savoury** and **sweet cuisine**. It is also excellent as a **skin and care oil** in the cosmetic sector. Known for its delicate nutty flavour, this valuable oil is not only popular with gourmets.

**Health and taste in one:
Organic-Coconut Oil VCO and RBD**

Organic virgin coconut oil (VCO), virgin and unadulterated, is a true treasure chest of health and multiple applications in the kitchen. It is extracted from fresh, ripe coconuts and is characterised by its incomparably rich taste and numerous **health benefits**. It is important to note that organic virgin coconut oil (VCO) is produced in a gentle process that ensures that the natural nutrients, flavour and fragrance of the coconut are largely preserved.

This distinguishes it from **refined organic coconut oil (RBD)**, which often undergoes chemical processes and does not contain the full flavour and nutrients of the coconut. This **tasteless oil** has a similar consistency and fatty acid composition to palm oil, making it a good substitute in food production.

We source both **VCO** and **RBD** from our certified organic farming projects in Sri Lanka and the Philippines.
