Harvesting in Kenya: Organic Macadamia

Stability and new regulations.

The current organic macadamia harvest in Kenya is going well. Prices for farmers have been set at a stable, high level, which ensures a reliable market situation. From February, producers will be allowed to sell their macadamias directly.

Important to know: Chinese buyers are currently no longer allowed to purchase whole macadamia nuts (nut-in-shell). This ensures that the processing can be completed entirely on site in the producing country by local workers.

Our goods arrive as an assured producer product - quality is therefore guaranteed under appropriate conditions! However, the current situation remains unclear. It is impossible to predict how long this regulation will remain in force.

Secure your delivery now and make a note of your purchase! We will of course keep you up to date on all developments.

In our range you will find:

Bio-Macadamia

Origin: Kenya
